

Name:

Radio Audio Script

Part of the pre-production, planning and organizing your audio will help you finalize your ideas and create specific details about what you want your audio output to sound like. Creating voice over lyrics and knowing key elements such as effects, music tracks, sound clips, etc. will save you time, effort and speed up production and post-production processes.

Some common acronyms:

SFX – Sound Effects, EFX – Modification Effects, MVO – Male Voice Over, FVO – Female Voice Over
