CUTTING A CURVE ON THE BANDSAW

❶ Adjust blade guard 12mm. to 25mm. above the *thickest* part of work.

    ☞ **Be sure** all guards are *tightened.*

    ☞ Turn on dust collector.

    ☞ Be sure all lines are legible.

    ☞ Know where you are going to enter and exit the cut.

❷ Turn bandsaw on and **wait** until it has reached *full speed.*

❸ Line up cut with blade.

❹ Feed work into blade **slowly** and **evenly.**

❺ **Do not cut sharp curves.**

    ☞ Make several cuts if necessary or make relief cuts.

    ☞ Turn machine **off** *to back blade out of a cut.*

❻ When finished, turn off bandsaw and **apply brake.**
