

## Combination Disk/Belt Sander General Safety and Operation

# Safety First

### Description:

The combination disk sander is extremely useful for sanding end grain and outside curves of wooden projects. When it is properly setup, it can be very accurate.

### Operation:

The table can be adjusted for angles or to have a larger gap between the table and disk to compensate for

different shaped projects. When starting let the belt/disk come up to full speed before using. On disk part, ensure you are using the down turn towards the table to remove material.

### Things to Remember:

- + After the machine has been turned off remember the disk takes time to stop turning
- + Always work on the downward turning side of the disk so that the stock is pushed down onto the table

Extra Notes:

---

---

## Safety Contract for the Combination Disk/Belt Sander

### Rules to remember

1. Wear safety glasses!
2. Connect and turn on the dust collection system for reduced sawdust spread
3. Do not touch the disk/belt abrasive when it is turning
4. Do not sand pieces of wood that are too small to hold safely
5. Do not try to sand off large amounts of stock, remove excess with a cutting tool first
6. Do not apply too much pressure on stock when sanding or else it will burn
7. If sandpaper is dull, ripped, or wrinkled, do not use until abrasive sandpaper is replaced
8. Turn machine off when finished, needs some time to actually stop and clean area
9. Before replacing paper, be sure that power is disconnected

+ Look at yourself; if you have all your body parts and you're not bleeding, then you can appreciate the benefits of safety in the shop.

I was present for the instruction on the safe use of the Disk Sander and I understand its meaning and will operate this machine in a safe method as described. I feel comfortable in the operation of the Drill Press and if in any doubt will ask for help from an Instructor.

Fill in below, the lesson date (year/month/day), check off that you have seen the instructor's parts, safety, and operation demonstration, your name, check off your completions, signature and then have your instructor sign-off for your contract to be allowed to use the machine.

Students to fill in all column boxes below once completed, then sign.						Teacher
